

## Network Engineers

Reference:  
NOC1 1612--09

**SpeedCast Limited** is a wholly-owned subsidiary of Asia Satellite Telecommunications Company Limited. SpeedCast provides reliable broadband Internet access via satellite to enterprises across Asia coupled with a rich mix of syndicated multimedia content. In addition, SpeedCast Broadcast leverages on both its satellite platform and its network of remote content servers to provide Content Distribution Network (CDN) capabilities to enterprises.

To cope with our fast expansion, SpeedCast is seeking a well-organized candidate to join our Finance and Admin team in our Causeway Bay Head Office. If you are looking to find a team of champions that can bring the best out in your own capabilities and spur you on to greater heights and challenges, SpeedCast may be the company for you. We offer attractive salary, generous fringe benefits and excellent career prospects.

Report to Operations Manager in our Network Operation Centre (NOC) in Tai Po. The incumbent is required to perform technical assistance to existing broadband customers, systems and network operations monitoring, product evaluations and other ad hoc projects as directed by management, capable of dealing with different service providers which encompasses global support to achieve the short lead-time to service provisioning.
