LAUNCH Internet

Reliable, fast and fully managed

speedcast

THE CRITICAL COMMUNICATIONS COMPANY

Speedcast LAUNCH[SM] Internet is the front-runner in providing remote staff and crew — whether located on maritime sites or spread across multiple land sites — with fast and reliable internet access at the industry's most competitive rates.
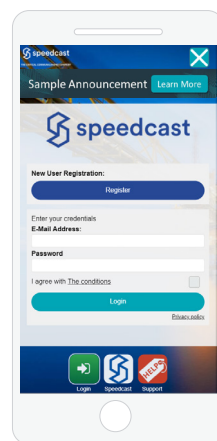

With LAUNCH Internet, Speedcast manages and provisions all aspects of staff and crew usage and satellite connectivity, relieving the remote site operator of any administrative burdens and monthly commitments. Users can simply select Wi-Fi packages and make purchases through the easy-to-use LAUNCH Internet Portal. The flexible portal can be custom configured to the layout needs of the owner or operator and provides access to comprehensive self-service and support options.

Take care of your crew's personal internet connectivity needs anywhere in the world so you can focus on what's most important: your business.

Contact a Speedcast Sales Representative or email info@speedcast.com for more information.

Access Points

Provides Wi-Fi coverage in specific designated areas

FULLY MANAGED

- Speedcast manages all aspects of crew usage, including payment and 24/7 troubleshooting and support.
- Remote staff and crew access an online self-service portal to purchase data plans via credit card or PayPal, or to use a voucher code.
- The solution utilizes a range of C-band and Ku-band antennas and offers multiple allowance plan options.
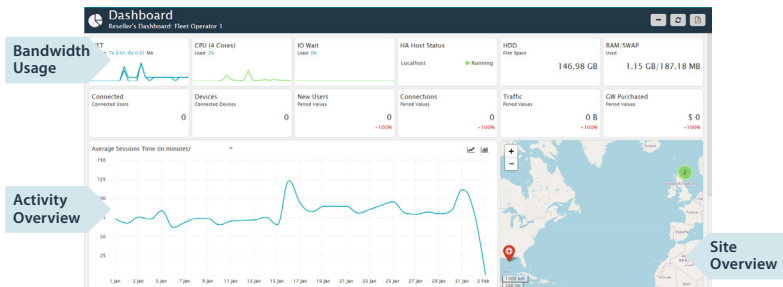

SIMPLE AND SECURE

- Offload remote staff and crew Wi-Fi management, administration and network support to Speedcast's professionals, and free your remote-site managers to focus on more strategic initiatives.
- Offer higher throughput and unrestricted, better-quality service against paid data allowances for crew.
- Secure internet connection is backed by 24/7 monitoring and management.

Speedcast LAUNCH Internet – End User Portal & Customer Reports

End users get access to data usage status and tools to help manage and get the most out of the data packages they buy.

Customers can view reports to monitor crew network bandwidth, utilization, and manage remote site morale and welfare requirements.
