

SpeedTalk™ is our carrier-class core voice service, enabling customers to make and receive calls from remote locations or at sea. By offering voice services through Tier-1 PSTN providers, customers can enjoy most competitive rates with guaranteed quality in conjunction with our VSAT solutions.

SpeedTalk includes inbound and outbound local, long-distance and international calling over high-quality IP networks. Remove the stress, complexity and capital costs involved with deploying and operating an enterprise voice solution.

Contact a Speedcast Sales Representative or email info@speedcast.com for more information.

FEATURES

- Highly resilient and secure infrastructure.
- Built upon our global terrestrial network.
- Voice core concentrators geographically separate to be closer to the customer premises and reduce local loop costs.
- Tier-1 carrier neutral voice providers allow interconnection between many colocation and interconnection providers and provide diversity and flexibility .
- Customized voice solutions tailored to our customers actual business needs.
- Seamless integration between different WAN access technologies (satellite, wireless, LTE, etc.).
- Highly competitive global rates.
- Fully featured voice services without the burden of maintaining costly communications platforms or highly trained personnel.
- 24/7 global monitoring and support.

SPEEDTALK PORTFOLIO OF SERVICES:

- **Postpaid Voice:** Standard voice services, utilizing core Speedcast Voice features and services invoiced monthly in arrears with Speedcast standard tariffs.
- **Prepaid and Crew/Personnel Calling:** Card-based or pin-generated calling plans using prepay credits for managing voice expenditure and crew call access.
- **Managed Voice:** Customizable end-to-end managed voice solutions to meet customer needs from their remote locations to their corporate offices for efficient and seamless communication across physical locations that remove stressful complexity and capital costs involved with deploying and operating an enterprise voice solution.
- **SIP Trunk Integration:** Customized voice system integration with direct IP trunking between customers' PBX, Voice Gateways and voice-enabled endpoints to Speedcast Global Voice infrastructure with a fully redundant global footprint.
- **Regionalized Direct Inbound Dialing (DID):** International telephone numbers (DIDs) for over 60 countries available, allowing third parties in those countries to call the remote location for the cost of a local call.
