How to Minimize Data Usage

Log out of the network immediately after use by going to launch.speedcast.com

- Consider adjusting playback settings to **low/basic** quality setting for streaming services such as YouTube, Netflix and Hulu.

- Disable In-app updates and music/photo services
- Use Low Data Mode on iPhone, iPad and iPod touch
- *Go to **Settings** > Tap **Wi-Fi** > Tap the information button (i) next to the Wi-Fi network that you're connected to > Turn on **Low Data Mode**.*

Android Device

Apple (iOS) Device

	Android Device	Apple (iOS) Device
Disable Location Services	• Go to **Settings** > **Connections** > **Location** > Tap **Location Off**	• Go to **Settings** > **Privacy** > Tap **Location Services** off
Disable Automatic App and Operating System Updates	• Open **Google Play Services** • Tap the Ξ icon on the top-left > Tap **Settings** > **Auto Update apps** • Select **Do not auto-update apps**	• Go to **Settings** > **iTunes & App Store** • Under **Automatic Downloads** switch each to off
Disable Cloud Data Backup Services and Cloud Photo Backups	• Go to **System** > **Notifications & Actions** • Scroll down to **Show Notifications from these apps** > find **iCloud** and turn it off	• Go to **Settings** > **iCloud** > If listed, switch **iCloud Drive** and **iCloud Photo Library** to off • Switch each listing in the iCloud screen to off
Disable Background Applications	• Tap the app window button > Windows of open apps will appear > swipe left to close each app	• Double-click on the **Home** button > Windows of open apps will appear > swipe up to close each app
