

# RAPID DEPLOY KIT

ENABLED BY STARLINK

## ALL-IN-ONE, PORTABLE COMMUNICATION

In disaster response, every second counts. Using Starlink's high-speed low latency connectivity, Speedcast's Rapid Deploy Kit enables voice, video, IoT, telemedicine and more. The Rapid Deploy Kit includes a Starlink Flat High Performance Kit and a network device. Everything is packaged in an easy to carry case, making it the ideal on-the-go solution for first responders or remote workers in media, mining, energy, government or NGOs.

### PORTABLE

- The Rapid Deploy Kit contains a Starlink kit and peripheral equipment packaged for quick turnaround to any global destination
- Assembly time is less than 15 minutes with minimal maintenance

### EASY TO DEPLOY

- The Rapid Deploy Kit is designed to be set up by one person
- Comes with a network device, which is simple to install and is integrated with existing infrastructure
- A cloud-based network, email and firewall management options available

### GLOBAL

- The Rapid Deploy Kit provides high speed internet services from anywhere in the world
- High-speed broadband connectivity delivered over Low Earth Orbit (LEO) satellites
- Upon ordering, the Rapid Deploy Kit is delivered to your doorstep
