About Speedcast

Speedcast is the leading communications and IT services provider, delivering critical communications services to the Maritime, Energy, Mining, Media, Telecom, Cruise, NGO, Government, and Enterprise sectors. The company leverages its global network platform to provide fully connected systems that harness technologies and applications to transform what remote operations can achieve. With more satellite capacity than any other provider, Speedcast enables fast, seamless pole-to-pole coverage from a global hybrid satellite, fiber, cellular, microwave, MPLS and IP transport network with direct access to public cloud platforms. The company also combines differentiated technology offerings to provide smarter ways to communicate and distribute content, manage network and remote operations, protect and secure investments, and improve the crew and guest experience. With a passionate customer focus and a strong safety culture, Speedcast serves more than 3,200 customers in more than 140 countries.

Mission

We help customers achieve a more connected, more capable tomorrow. At Speedcast, we innovate and optimize development across key areas of technology, services, processes and systems to help customers evolve their operations and maximize what their remote sites can achieve.

Comprehensive Connectivity and Innovation Solutions

Our solution expertise is vast and deep, spanning more industries and verticals than anyone else.

Connectivity

Speedcast unites our diverse connectivity resources into a seamless network experience. You can trust your most critical operations to run effortlessly on the world's largest remote communications network, with capacity from more than 95+ satellites and 35+ teleports, layered with redundancy across fiber, microwave and 4G/5G.

Network Management

As networks and satellite connections grow, network management becomes crucial for business operations. Speedcast's intelligent network management solution makes sure you have reliable, high-quality connectivity when you need it, where you need it.

Applications and Solutions

Speedcast provides full access to our portfolio of applications that cover a comprehensive range of voice, data, network, cybersecurity, remote video streaming, crew welfare and content requirements.

Professional Services

With our professional services, you have ready access to our knowledgeable team of experts, who deliver network and system integration, innovation and testing lab services, and digitalization and IoT services.

Internet of Things

We'll help you build and optimize your IoT network for greater cost savings, efficiencies and safety.

Cloud

With the capability to seamlessly interoperate cloud-based technologies with global satellite and terrestrial infrastructure, Speedcast provides customers with end-to-end services from design to implementation and management of cloud-based solutions.
